MODERATE

WHAT THIS MEANS

A mixed picture — some dimensions are working for you, others could use gentle attention. Start small with one growth area at a time.

For self-awareness and education — not a diagnosis

MOSAIC assessments are designed to help you reflect on your strengths and growth areas. They are NOT a clinical or psychological diagnosis of any kind. If you have concerns about your mental health, wellbeing, or a loved one's, please consult a qualified professional — a counsellor, clinical psychologist, or mental-health physician.

These assessments draw on established psychological frameworks and, in some cases, are adapted from validated instruments — but the MOSAIC versions are short, localised reflections and are not themselves validated or standardized tests.
